Cyber Security Month Proclaimed in County

Cumberland County, Pa. – The Cumberland County Board of Commissioners proclaimed October as Cyber Security Awareness Month during their public meeting today. This national initiative is dedicated to educating the public on the importance of cyber security both in the home and workplace.

This year National Cyber Security Month will feature the following weekly themes:

Week 1: October 2-6, 2017 – Simple Steps to Online Safety

Week 2: October 9-13, 2017 – Cybersecurity in the Workplace is Everyone's Business

Week 3: October 16-20, 2017 – Today's Predictions for Tomorrow's Internet

Week 4: October 23-27, 2017 – The Internet Wants YOU: Consider a Career in Cybersecurity

Week 5: October 30-31, 2017 – Protecting Critical Infrastructure from Cyber Threats

The County's Information Management and Technology Office (IMTO) will spend October providing educational reminders to staff on ways to protect themselves when online, both in the office and at home. The County will also share safety tips and reminders with the public through its many social media channels. You can join the County and many other organizations in recognizing National Cyber Security Month by using #CyberAware in your own social media posts.

Cyber Security Awareness Month is an initiative of the U.S. Department of Homeland Security. For more information on the program, visit www.dhs.gov. For more information on Cumberland County's IMTO department, visit www.ccpa.net/imto.
