Debra Bowman 401 E. Louthier Street  
email: [dbowman@centralpaconservancy.org](mailto:dbowman@centralpaconservancy.org) Carlisle, PA 17013-2652

## EROSION AND SEDIMENTATION CONTROL PROGRAM

The priority of the erosion and sedimentation pollution control program is the protection of water resources from the impacts of accelerated erosion and the sedimentation that results during earthmoving activities. The District wants to ensure that the soil and water resources of Cumberland County are used wisely. The District has a signed agreement with the Department of Environmental Protection (DEP) to administer the erosion and sedimentation control and the National Pollutant Discharge Elimination System (NPDES) programs. On November 19, 2010, revisions to Chapter 102 relating to erosion and sediment control and stormwater management became effective. We have been working with the regulated community to provide them with these changes.

**NPDES Permits and Fees** - A major change to the regulations is that the federal NPDES program now requires permits to be obtained to allow the discharge of storm water from earthmoving activities disturbing **one acre** of land or greater over the life of the project. A general NPDES permit is required for projects in non-special protection watersheds with an associated filing fee of \$500. Individual NPDES permits are required for projects located in special protection watersheds (high quality or exceptional value). The application filing fee for an Individual permit has been increased from \$500 to \$1500. There is also a new \$100 per disturbed acre fee payable to DEP. Riparian buffers are a new requirement for projects located in special protection watersheds. The post construction stormwater management plan must now include long-term operation and maintenance deeding restrictions. A licensed professional must be present for critical stages of construction and must sign-off on the recorded drawings.

**Agriculture** - The changes to the Chapter 102 regulations have also affected agricultural operations. Farms have to consider animal heavy use areas when developing their conservation or erosion and sedimentation control plans. NPDES permits are not required for agricultural plowing or tilling or animal heavy use areas. They are required for agricultural construction activities which will disturb 1 acre or more such as manure storage facilities, barn expansions or new animal housing. Agricultural plowing and tilling activities within 100 ft. of a stream must maintain a minimum 25% plant cover/crop residue or implement additional BMPs.

Middle Spring Dam Before

The Middle Spring (Shoops) Dam was constructed in 1901. It was first used as a mill and later for hydroelectric power.

Middle Spring Dam After

The Middle Spring Dam was removed in August of 2010. It was removed to eliminate owner liability and increase habitat for aquatic species on the popular trout stream.

## EROSION CONTROL PROGRAM STATISTICS SINCE 2000

YEAR	PLAN RE-VIEWS	REVIEW FEES	NPDES PER-MITS	PERMIT FEES	INSPEC-TIONS	ENFORCE-MENTS	COM-PLAINTS	TOTAL ACRES	DIST ACRES
2000	181	\$42,970.00	34GP & 4IP	\$11,000.00	330	2	66	3497	1358
2001	182	\$49,188.00	25GP & 2IP	\$7,250.00	201	2	49	2799	1406
2002	142	\$47,171.00	35GP & 2IP	\$14,000.00	367	4	49	3417	1534
2003	153	\$42,026.00	30GP & 7IP	\$17,250.00	394	1	43	2836	1010
2004	152	\$67,985.00	56GP & 3IP	\$18,000.00	306	5	50	3426	1286
2005	183	\$113,352.95	63GP & 11IP	\$23,250.00	417	0	45	4702	2098
2006	152	\$149,013.10	56GP & 11IP	\$21,500.00	489	3	49	5553	2192
2007	158	\$200,409.00	56GP & 7IP	\$17,250.00	378	1	44	4419	1803
2008	147	\$77,737.50	31GP & 17IP	\$19,250.00	509	5	36	4595	1214
2009	97	\$59,170.00	22GP & 8IP	\$12,250.00	549	0	20	1627	951
2010	90	\$130,114.00	28GP & 9IP	\$17,500.00	547	0	17	1500	738
<b>TOTALS</b>	<b>1637</b>	<b>\$979,136.55</b>	<b>436GP &amp; 73IP</b>	<b>\$178,500.00</b>	<b>4487</b>	<b>19</b>	<b>353</b>	<b>32075</b>	<b>8996</b>

## NUTRIENT MANAGEMENT PROGRAM

The Cumberland County Conservation District (CCCD) continues to participate and support Pennsylvania's Nutrient Management Program by reviewing and writing Nutrient Management Plans (NMPs), and educational outreach. During 2010, the District approved five Concentrated Animal Operation (CAO) or Concentrated Animal Feeding Operation (CAFO) plans and three Volunteer Animal Operation (VAO) plans. One NMP amendment was approved and one operation was removed from CAO status to VAO status.

In addition to the plans being implemented, the District performed status reviews of CAO's and CAFO's to ensure compliance for operations required to maintain a Nutrient Management Plan. In 2010, seven CAO/CAFO status reviews were performed and five VAO reviews were performed.

When a manure handling issue arises, CCCD is available to address the complaint and determine if further action is needed. In 2010, the District handled seven manure related complaints. One complaint was referred to Pennsylvania Department of Environmental Protection (PA DEP).

The Cumberland County Conservation District, in cooperation with Penn State Extension, co-ordinated several meetings for Certified Manure Haulers in 2010. In February, a meeting was held at the Lighthouse Restaurant in Chambersburg, PA and during the month of December, three separate meetings were held. Through these meetings approximately 86 manure haulers earned credits to maintain their certification. The presenters at the meetings included staff from the State Conservation Commission, The PA Agricultural Ombudsman Program, Penn State Extension and Cumberland County Conservation District.

The District continues to encourage farmers to practice responsible nutrient management by implementing a Nutrient Management Plan and Best Management Practices. By doing so, we aim to strengthen the Nutrient Management Program and water quality protection in the Commonwealth and beyond.

## CHESAPEAKE BAY PROGRAM

The Cumberland County Conservation District continues its efforts to reduce sediment and nutrients from entering the Chesapeake Bay Watershed through implementation of Best Management Practices (BMP's) and education. The availability of funding to help farmers implement needed conservation practices continues to be our biggest challenge.

### ***Chesapeake Bay Special Projects***

*Cover Crop* - Once again the Conservation District received funding to assist farmers in planting a small grain winter cover crop. 1,242 acres are enrolled in the current cover crop program. Because a winter cover crop protects soil from water and wind erosion, captures and holds manure nutrients, and is essential to no-till production systems, providing cover crop incentive payment continues to be a priority.

*No-Till Planter Rental* – There was continued funding offered this year by the Conservation District for the No-Till Planter Rental Program. Farmers could rent a no-till planter, or have a custom operator plant a crop by no-till means. This allows producers who are not financially able to purchase a no-till planter achieve their goal of reducing erosion in their crop fields. 619 acres were planted through this program in 2010.

*Conservation Planning* - Historically there has been a waiting list for farmers in Cumberland County to have a Conservation Plan written or updated for their operation. The Conservation District obtained funding through the Chesapeake Bay Special Projects Program to provide financial assistance for a producer to have a plan written by a technical service provider.

*Stream Bank Fencing* – Allowing farm animals to have free access to streams and stream banks can contribute large amounts of nutrients and sediment to the waters of the Commonwealth. The Conservation District has obtained funding to install fencing along stream banks to help alleviate this situation.

Please contact Pam Eyer at the District for more information at (717) 240-5357 or [peyer@ccpa.net](mailto:peyer@ccpa.net)

### ***Education***

The Conservation District strives to be represented at agriculture related meetings in Cumberland County by having a display and personnel present to give information and answer questions. Through this and many person to person contacts, relationships are built with the farming community so that we can provide assistance not only to address existing environmental concerns, but also to preempt problems by producers knowing who to consult for information.

### ***The Future***

A big challenge in 2011 will be the ability of the Conservation District to provide the financial assistance to farmers that will enable them to install the conservation practices needed to protect the waters of the Commonwealth. With Pennsylvania being required to meet the EPA mandated Chesapeake Bay Cleanup goals, this could amount to a significant number of practices with a large price tag. The Cumberland County Conservation District will continue to provide assistance whenever possible to help with the protection of the Chesapeake Bay Watershed.

## DISTRICT ENGINEER'S REPORT

Michael Lubinsky, PE

Projects Designed, Reviewed, Inspected in 2010

Name	County	Best Management Practices
Brownwell Dairy	Cumberland	Heavy Use Area, Waste Storage, Wastewater Treatment
Abe Pugh	Franklin	Waste Composting Facility
Jay Hammond	Franklin	Roofed Heavy Use Area, Waste Storage Facility
Ben Gamble	Franklin	Roofed Heavy Use Area, Waste Storage Facility
Charles Baer	Cumberland	Dry Hydrant
Jay Hammond	Franklin	Waste Storage Facility, Heavy Use Areas
Jim Cohick	Cumberland	Wastewater Treatment System
Bob Boyce	Cumberland	Watering System
Don Leatherman	Cumberland	Watering System

BEFORE

AFTER

On the cover: (top left) Cedar Cliff teacher Justin Weaver explains macro invertebrate sampling on a field trip to Boiling Springs. (bottom right) Big Spring habitat enhancement project located in North Newton and West Pennsboro Townships.

Back cover: (left column) District board member Don Deckman is recognized by County Commissioners for donating the Christmas tree to be displayed in the Courthouse lobby. (middle picture) The Conservation District display at Jubilee Day held annually in Mechanicsburg. (bottom picture) Students gather around for the welcome and introduction at the Envirothon at Mechanicsburg Sportsmen's Association. (right column) Log deflectors can be seen during construction at the Big Spring Creek enhancement project. (middle picture) Tree seedlings waiting for pickup at the annual Tree Seedling Sale. (bottom picture) Small grain winter cover crop planted with help from an incentive payment through the Chesapeake Bay Special Project Funding Program.

## WATERSHED PROGRAM

### ***Pennsylvania Association of Conservation Districts (PACD) mini grants***

The District received two mini grants through PACD. The first was used to produce rain barrels at Cedar Cliff High School. After construction, the rain barrels were offered to County citizens along with brochures to educate the public about stormwater runoff and nonpoint source pollution. Part of the grant this year was to engage students in a hands on education experience in the field. The District took 2 high classes from Cedar Cliff to sample macroinvertebrates in the Conodoguinet and Yellow Breeches Creek watersheds. The other grant was used to fund multiple workshops on protecting homeowners' well water from pollution and managing their septic systems. Those who attended the workshop received a free water test for bacteria and E.coli. The same workshop will be held in the spring of 2011.

### ***Growing Greener II grants***

The District administered two grants through DEP's Growing Greener II program. One grant is for implementing agricultural best management practices (BMPs) in impaired watersheds. The BMP's installed through this grant included waste storage structures, roof runoff management, barnyard areas and manure transfer systems. Another grant is for funding stormwater BMP design and installation around the Allen Road office which houses the Conservation District. We sent out requests for qualifications (RFQ's) and received several responses. After reviewing the RFQ's, two consultants were interviewed and a selection was made. BMP design and layout is ongoing with this project.

### ***Section 319 Nonpoint Source Pollution grants***

The District applied for and received a grant to implement BMP's outlined in our approved Watershed Implementation Plan (WIP) for the Middle Spring Watershed. This grant will be used to help finance various agricultural BMP's within the watershed. We anticipate working with about 10 landowners through this project.

Cedar Cliff teacher Justin Weaver, along with some of his students, seen here sampling for macroinvertebrates to assess water quality.

### ***Leaf Pack Workshop for Educators***

This was the first year we held a Leaf Pack workshop for high school teachers. The Leaf Pack workshop is a program developed by Stroud Water Research Center. The workshop is a 2 day event, where Stroud Water Research Center provides information about using the Leaf Pack kit and a background on macro-invertebrate identification. The workshop was held at Shippensburg University and about 20 educators attended. Each attendee received a Lamotte Leaf Pack Kit for attending. Funding for the workshop was provided by CSAW, Cumberland Valley Trout Unlimited and the Franklin County Watershed Association. We are scheduling another workshop for 2011.

### ***Winter Watershed Association Meeting***

The Cumberland, Franklin and Fulton County Conservation Districts co-organized the Annual Winter Watershed Association meeting. The meeting was December 6, 2010, at Shippensburg University. The meeting provides an opportunity for the watershed groups in the tri-county area to talk about their successes and lessons learned over the past year. The guest speaker for the meeting was Donna Morelli, Director of the Alliance for the Chesapeake Bay, PA Office. She spoke about the latest information regarding the Chesapeake Bay TMDL and PA's Watershed Implementation Plan. Stephanie Eisenbise from the Chesapeake Bay Foundation and Zack Roeder from DCNR also spoke about riparian buffers. We thank Shippensburg University for their support and donating the use of their facilities.

### ***Water Testing Program***

The Cumberland County Conservation District continued to serve the citizens of the County through the monthly water testing program. Through this program, water can be tested for a variety of contaminants such as coliform bacteria, e.coli, nitrates, lead, iron, sodium, etc. In 2010, 137 tests were processed by the District for a minimal fee and sent to Analytical Labs, Middletown, PA for analysis. There was an upward trend in the number of samples that tested positive for Total Coliform Bacteria in 2010(44%) compared to 2009(40%).

## WELL WATER WORKSHOP

### “What you need to know about your well water and NPS pollution”

The Cumberland County Conservation District (CCCD) and Penn State Extension held a workshop at the County’s Allen Road Building on October 12, 2010. A free Total Coliform Bacteria and E.coli test bottle was given to the 17 participants who then returned the samples to be tested. The results demonstrated the correlation between non-point source (NPS) pollution and their groundwater. Kim Falvey collaborated with Thomas McCarty and George Herd to develop the presentations, press releases, pre and post tests, and evaluation. Three separate presentations were given covering well water basics, septic system management, NPS pollution, and understanding and interpreting water testing results.

Attendees were given a pre and post test on NPS pollution, watersheds and the Chesapeake Bay, and water conservation. Average scores from 7.2 out of 10 on the pre test to 8.0 out of 10 on the post test illustrated that the participants increased their knowledge of these topics. Evaluations were also collected from all the participants and they showed that most people were either planning on changing their current habits or would consider changing habits in the future. Some things they were planning to change were; fixing leaky fixtures, installing low flow shower heads and faucets, conducting annual water tests, and safely disposing harmful chemicals they currently pour down their drains. Most said they would consider installing high efficiency toilets, dishwashers, and clothes washers in the future and also replacing well caps with sanitary well caps.

Another workshop is planned for April 12, 2011 for the first 43 people that register.

---

### PRE-SIDEDRESS NITROGEN TESTING (PSNT)

The Cumberland County Conservation District once again offered the Pre-Sidedress Nitrogen Testing (PSNT) on corn fields to local farmers. The testing is funded by a grant through the Chesapeake Bay Program and is a free service that the District has offered for the past 10 years. In 2010, two interns from Shippensburg University, along with staff from the District and NRCS, tested 105 fields representing 1557 acres of corn. Of the 105 fields tested, 15 fields had a recommendation for additional nitrogen. The District will be offering the program again in 2011.

---

### GRASS ROOTS: PRESCRIBED GRAZING FOR THE 21ST CENTURY

Grass Roots supports the conversion and / or significant improvement to prescribed grazing in South Central, PA. Prescribed Grazing is an interactive planning method, done with the operator based on individual goals and needs which can include, but are not limited to: intensive rotational, rotational, and continuous grazing. Areas already in pasture that need significant improvements may be areas that are continuously over-grazed, with substantial amounts of bare areas or undesirable vegetation. To help meet these goals Grass Roots joins with local farmers, County Conservation Districts and other partners with assistance from the United States Department of Agriculture to promote grazing in Pennsylvania. In 2010, Grass Roots helped fund riparian fencing and a waterline for a rotational grazing operation within the County.

## TREE SEEDLING SALE FINANCIAL REPORT

**Total Gross Sales - \$19,432.55**

Tree Sale Expenses	
PA Dept. of Ag	\$ 40.00
US Postal Service	\$ 412.00
Bruce Payer	\$ 72.00
Ernst Cons Seeds Inc	\$ 294.98
Pikes Peak Nurseries	\$ 1,881.40
Rowe's Print Shop	\$ 373.75
Strathmeyer Forests	\$ 2,058.00
Edgar Wright	\$ 680.00
Dutch Mill Bulbs	\$ 447.00
Treessentials Co	\$ 1,714.08
Consolidated Plastics Co Inc	\$ 169.08
Adams County Nursery	\$ 4,122.86
Kruger's Rental	\$ 349.86
Samuel I Minder Nurseries Inc	\$ 1,588.00
The Patriot News	\$ 167.18
PA Department of Revenue	\$ 10.32
PA Department of Revenue	\$ 1,099.96
<b>Total Expenses</b>	<b>\$15,480.47</b>

Tree Sale Totals	
Item	2010
Blue Spruce	1,350
Douglas Fir	2,100
White Pine	2,400
Concolor Fir	1,200
Red Maple	0
Sugar Maple	700
White Oak	1,050
Red Oak	1,350
Butterfly Bush	0
Pear Packs	70
Apple Packs	105
Myrtle	5,250
Acorns	21
Wood Stakes	923
Tree Shelters	548

**Net Profit - \$3,952.08**

## CUMBERLAND COUNTY ENVIROTHON

Students from eight area high schools competed in the annual Cumberland County Envirothon on Tuesday, May 4, at Mechanicsburg Sportsmen's Association, in Silver Spring Township, Cumberland County. It was a pleasant, sunny Spring day to be outside learning about the environment. The top three overall scores were The Fish Squad from Cedar Cliff High School in third place with a score of 333, The Spring Peepers from Cumberland Valley in second place with a score of 344, and the 2010 Cumberland County Envirothon winners were The Massasaugans from Cumberland Valley, with a score of 363. The Massasaugans represented Cumberland County at the 2010 Pennsylvania Envirothon at PPL Montour Preserve, Washingtonville, PA, on May 26. They finished 21<sup>st</sup> out of 65 teams that participated from around the state.

The Cumberland County Envirothon, presented by the Cumberland County Conservation District, is a fun academic event that provides high school students hands-on field experience dealing with environmental issues. Students complete five exams that present problems focusing on wildlife, aquatics, forestry, soils, and a current issue, which was Protection of Groundwater through Urban, Agricultural, and Environmental Planning. 104 students from eight different high schools participated. The schools represented were Big Spring, Camp Hill, Carlisle, Cedar Cliff, Cumberland Valley, East Pennsboro, Mechanicsburg and Shippensburg.

Representatives from the PA Department of Conservation and Natural Resources, PA Game Commission, PA Fish and Boat Commission, the Conservation District, the Cumberland County Planning Department and the Natural Resources Conservation Service administered the tests.

Mechanicsburg Sportsmen's Association served a picnic style lunch and Adams Electric Cooperative sponsored the Envirothon t-shirts that all participants received. During the awards ceremony, Laura Conrad from State Representative Glen Grell's office and County Commissioner Rick Rovegno handed out the awards.

Pictured with the winning team, The Massasaugans from Cumberland Valley, is County Commissioner Rick Rovegno and Laura Conrad from State Representative Glen Grell's office.

## 8<sup>th</sup> ANNUAL CUMBERLAND COUNTY CONSERVATION DISTRICT GOLF TOURNAMENT

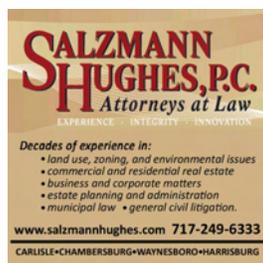

Everyone was eager to partake of the terrific steak and chicken dinner provided by Fiddler's Bar & Grille .

Great preparation and form is needed to land safely on this skill hole!

The 8<sup>th</sup> Annual Cumberland County Conservation District Golf Tournament was held at Mayapple Golf Links on Friday September 24<sup>th</sup> 2010. 92 golfers come out to enjoy a round of golf and to help support a good cause. Everyone enjoyed hot dogs and beverages during registration while they took chances on this year's door prizes. We owe a big THANK YOU to *Bass Pro Shops* for donating a beautiful, limited edition outdoor print to be raffled off. As golf concluded, everyone was treated to a terrific steak and chicken dinner prepared by Fiddler's Bar & Grille. The District would like to thank everyone at Mayapple and Fiddler's that helped make the day a success. Also a special thank you to all of our sponsors! Their contributions allow us to continue our efforts in providing scholarships to Cumberland County students. This year's event brought in over \$2,000 for scholarships. And finally, thank you to all of the golfers that came out to enjoy the day with us. We hope to see you again in 2011!

### Conservationist Level Hole Sponsors

Crabtree, Rohrbaugh & Associates  
Architects
